

Integrated Boothless System for All Cinemas

- Maximize Screens Up-Time & Box Office Revenue
- Optimize Operational Efficiency & Reduce Costs
- Space Efficient & Save on Facility Expenses
- Maintain Highest Visual & Sound Performance at All Times

- 1 Direct real-time control of projection & sound systems remotely. Eliminate needs to physically access & manipulate equipment.
- 2 Operate & configure all devices at audience level anywhere in the auditorium for best audience experience.
- 3 Real-time screen visual & sound quality diagnostics with ability to make all necessary adjustments instantly.
- 4 Automatic daily diagnostics on visual & sound performance to deliver warning alerts and daily reports online.

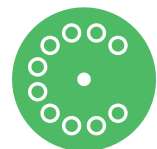

Experience Cineteer at Broadway Circuit (HK) & AMC Pacific Place

Broadway Circuit (Hong Kong) implemented the Cineteer Boothless Projection System in three of their newest and most advanced premium cinemas to bring the highest visual & sound cinema experience for their audience.

The automated Cineteer workflow ensures smooth operation of all projection tasks at *AMC Pacific Place* and the new boothless environments in *Broadway's MY CINEMA YOHO MALL*, and *MOVIE MOVIE Cityplaza*. Cineteer also conducts automated visual & sound quality diagnostics on every screen, twice a day, to guarantee highest cinema experience.
